Experience infrared

KEEP INNER BALANCE

We perform in the office, for our kids, for our home. To continue doing our best we need to keep our balance. Therefore, remove uncomfortable clothing, close the glass door behind you and choose an inspiring song or enjoy a few moments of silence.

Let the heat take effect. You can relax now.

TAKE CARE OF YOUR HEALTH

Wellness at home finds its way into your own four walls with b-intense® infrared cabins. Into rooms that you enjoy using, where you can rewind and feel comfortable. Our goal is to take the positive effect of warming sunlight home. Take your time, relax and enjoy the soothing warmth. Join us for a tour into the world of b-intense® infrared cabins. Taking care of yourself is the best investment.

Let's walk this path together.

Birgit Weberndorfer

CEO of b-intense®

CONTENTS

6 Introduction

You want to feel healthy, relax and enjoy the spare time. Infrared heat supports you on your journey to a life full of energy and health.

12 This is how infrared works

Warmth has been used to ease different symptoms for thousands of years. Find out more about the infrared effect.

14 b-intense® infrared radiation

Effect, quality and hygiene – the three pillars of our patented b-intense® infrared radiators, and why you should abstain from cheap ceramic radiators.

20 b-intense® infrared programs

Do you suffer from back pain or want to reduce your weight? Your new infrared cabin offers infrared programs for frequent needs or lets you set your own program.

24 b-intense® full equipment

Your new infrared cabin will arrive fully equipped: from the seating area with integrated headrests to the coloured light and warmth for your feet.

26 b-intense® design & production

You surely noticed that the b-intense® infrared cabin design is always in touch with the newest trends. This is no coincidence.

32 b-intense® applications & experiences

Find out more about how long-time b-intense® users prefer to apply their infrared cabins and what they tell about the effect. You will be surprised.

34 b-intense® models

Did we spark your interest? You will find a selection of open and closed cabins in different designs that meet your lifestyle.

52 Colors, woods & leather

Experience true individuality through different decors, woods and artificial leather to ensure your wellness oasis fits seamlessly into your living space.

YOUR JOURNEY STARTS NOW

FEELING GOOD. From hair to the little toe. This is what we want and what we can achieve. You support your own well-being with an active and balanced lifestyle. Enjoy the calm of the forest, inhale the fresh air and stop worrying about schedules.

GATHER ENERGY

EVERYDAY LIFE IS BUSY. Family, friends, work, the own four walls. All these things need to be taken care of. Despite all the challenges we should not forget about one thing: our own well-being. Physical activities promote a healthy body. Resting periods are important. This is where we come into play: with a b-intense® infrared cabin you can combine the important me-time, physical regeneration and energy for tomorrow.

A PIECE OF AUSTRIA

JUMPING INTO A COLD LAKE. This supports vitality. And just as Austrian lakes are known for their bathing pleasure, rich colours and a break from everyday life, so are our b-intense® infrared cabins. This piece of furniture provides soothing infrared warmth and relaxation. You haven't tried it yet? It's about time.

B-INTENSE® INFRARED RADIATION

LIKE A SHORT VACATION WITH LONG-TERM EFFECT

Warmth has been used in medical science successfully for thousands of years to soothe various symptoms.

Infrared radiation is the range of electro-magnetic waves that is below the red end of the visible light spectrum. The infrared spectrum, which we cannot see, is in the wavelength range from 780 nm to 1,000,000 nm (nanometres) Due to its warming and beneficial effect, infrared radiation is often referred to as “heat radiation”.

CONTACT-FREE TRANSFER THROUGH THE SKIN

Infrared radiation strikes our skin without contact and is converted into perceivable heat at the skins surface. The temperature increase does neither occur through skin contact with a heat source like it does when leaned against a tiled stove, nor is it due to hot ambient air, as in most conventional saunas. The ambient temperature in a b-intense® infrared cabin is at pleasant 27-37°C (thermo-neutral zone). The infrared treatment is as gentle as its effect.

INTENSIVE PRESPIRATION AND BENEFICIAL EFFECT

By applying heat to the skin, the blood flow to the connective tissue and musculature can be rapidly increased and the circulation is stimulated. Muscle cramps and tensions can be relieved. We start to perspire intensely. The metabolism can be stimulated, supporting weight loss. Regular use of a b-intense® infrared cabin can lead to increased well-being, improved resistance and promotes your health.

MILD STRESS WITHIN THE THERMO-NEUTRAL ZONE

Only in the thermoneutral zone (for a resting, unclothed adult approx. 27–37°C ambient temperature) our body’s heat loss and heat production functions are in balance. The heat flow to the body’s core which, as in a b-intense® infrared cabin, ideally occurs through the back, is tolerated and the supplied heat can be gradually spread from the body’s core to the body shell, from inside to outside. The whole body is gently heated from the inside.

My Advantages > b-intense effect

Soothing heat supply on a regular basis in a b-intense® infrared cabin can:

..... RELEASE TENSION IN NECK AND BACK

..... STRENGTHEN THE IMMUNE SYSTEM AND INCREASE YOUR WELL-BEING

..... PROMOTE BLOOD CIRCULATION IN THE SPINAL MUSCULATURE

..... PRODUCE INTENSE PERSPIRATION

..... HELP WITH WEIGHT LOSS

..... STIMULATE THE METABOLISM

..... FURTHER RELIEVE SKIN CONDITIONS

WHY WE HAVE THE BEST INFRARED

The modern and highly hygienic b-intense® infrared radiators are an advanced development of the classical red therapy lamp. The heat from the patented b-intense® infrared radiators is not only soothing, it also shows a healthy effect. The whole body is warmed through control of the heat regulation. Therefore, perspiration intensifies and comforting effects on musculature and metabolism show.

IN SHORT TERMS

Essentially there are shortwave (heats the body that is exposed to the radiation), mediumwave and longwave (heats the ambient air) infrared. The b-intense® full spectrum infrared radiator includes all three infrared areas since the skin absorbs the varying infrared wavelengths differently. This simulates the natural sunrays. Compared to this effect, the cheap ceramic radiators you can get in the store have more in common with a conventional heater.

Dr. Andreas Zimmermann
Developer of the patented
b-intense® infrared radiator

PATENTED INFRARED RADIATORS

“The new b-intense® infrared radiator provides the user with a modern, reduced design inside the cabin, aside from the healthy infrared effect. With this new radiator we can offer elegance in the cabin for the first time and move away from grids, bars, bolts and mere purposive structures. Our special innovation is the adhesion of the filter glass with the radiator case, which enables the radiator, the centrepiece and impact source, to stay 100% hygienic and clean.”

With its components manufactured in Austria, the b-intense® infrared radiator was awarded an Austrian patent for its special and hygienic build, which also complies with high design standards.

For more information visit www.b-intense.at/eu
My Advantages > b-intense® Infrared Technology

TECHNOLOGY FACTS

EFFECT, DESIGN AND HYGIENE ON A HIGH LEVEL

FULL SPECTRUM INFRARED LIGHT

The source of the b-intense® infrared radiation is a full-spectrum infrared light inside the heater. The light is positioned in front of a mirrored aluminium reflector, which distributes the heat radiation differently depending on the position (back or front). The infrared radiation thus covers the full infrared spectrum within the ranges on infrared A, B and C.

SIT DOWN, SWITCH IT ON, ENJOY

b-intense® infrared cabins heat up very quickly due to the full-spectrum heaters used and reach the desired operating temperature in a short time. They can be used spontaneously at a moment's notice.

FRAMELESSLY HYGIENIC

A special design feature of the b-intense® full-spectrum heater is the frameless bonded filter glass, which allows a smooth finish to the rear wall of the cabin. A flat glass sheet with no frame or screw enables easy cleaning with a spotless and hygienic result.

PLEASANT RED LIGHT

The high-grade Robax glass of the b-intense® infrared heater reduces the visible portions of the infrared light, which are too bright. As a result, in addition to the infrared radiation, a pleasant red glow passes through the glass, supporting the well-being.

COORDINATED PERFORMANCE

Compared to the front region, due to the proximity to the body, a less powerful infrared heater is used in the back. The back heater allows the heat to enter the body via the spine area. The stronger front heater additionally ensures pleasant temperatures during your infrared session.

OUTSTANDING DURABILITY

b-intense® infrared heaters have an exceptionally long service life. The infrared light inside the b-intense® heater comes with a 10-year warranty.

Your safety is important to us! All units of the b-intense® infrared cabins including the full spectrum radiators are inspected by independent institutes and approved to be safe. Therefore, you can appreciate infrared without hesitation and enjoy soothing, effective warmth.

b-intense® GmbH is certified according to ISO13485 standard and meets the requirements for quality management of the design, development and production as well as assembly and maintenance of medical devices.

The b-control infrared controls are a b-intense® innovation and are manufactured in Austria.

EVERYTHING UNDER CONTROL

WITH THE B-CONTROL PANELS

INDIVIDUAL INFRARED CONTROL

The b-control control panels have a very modern and advanced look. The control panels are very flat, operated by a simple touch and offer an astonishing range of functions. All functions of the b-intense® infrared cabins are operated using the infrared controls: infrared heater (individually controllable), LED coloured light, music, fresh air system and under-foot heating. Via the program button users can select from five different automatic program sequences. These include the popular applications BACK and WEIGHT LOSS.

CONTROL EACH RADIATOR INDIVIDUALLY

It's a b-intense® innovation – every radiator is controlled separately and individually. Everyone experiences heat differently. Some may think it's not enough, while others need less heat.

B-INTENSE® MOMENTS APP – WAVE BOREDOM GOODBYE

In addition to the easy control of all cabin functions via b-intense®'s App on your smartphone or tablet you can also use a wide variety of entertainment features: playlists, videoclips, health tips and - for young and young-at-heart users - social media. You can keep track of your health benefits with a personal statistic.

B-INTENSE®

PROGRAMS

INFRARED PROGRAMS FOR YOUR NEEDS

b-intense® infrared cabins can be operated individually. The power of the infrared heater and the under-foot heating can be individually regulated in 10% increments. The accessory applications - LED coloured light, music and aroma bath – can also be used whenever you wish. Additionally, a b-intense® infrared cabin offers five infrared programs, from which the user can select the perfect program sequence, according to your mood and time management. Starting at a short heat load, revitalising and regeneration to the classics back and weight loss.

Now you decide on your favourite infrared program, whether you choose to listen to music or just close your eyes and enjoy the silence. In any case you will be comfortably leaned back on cosy backrests.

HEAT LOAD

As preparation for exercise or a subsequent therapy (e.g. massage).

 15 min

REVITALISING

An intense heat impact in the back area activates your organism for more vitality and energy for the day.

 23 min

BACK

The extended and soothing program to relieve tensions in the back.

 44 min

REGENERATION

To revive and recover, for inner peace following exertion, stress and hectic.

 45 min

WEIGHT LOSS

To support diets and aid in losing weight through increased metabolism.

 51 min

INDIVIDUAL PROGRAM

Your favourite program is not included? Just adjust it to your own needs.

 individual

ME-TIME

WHAT DOES LUXURY MEAN TO YOU? Leaning back, no time schedule, just owning a moment? Our time is strongly limited by our many tasks and hobbies. Taking the necessary resting time is crucial to cope with everyday life.

FOR ALL SENSES

FULL EQUIPMENT AT B-INTENSE®

TO CONSCIOUSLY TAKE SOME TIME and enjoy it. This comes easy in a b-intense® infrared cabin. The health-promoting infrared cabin is upgraded through our wellness additions.

SEATING AREA DELUXE

A comfortable seating position is important, no matter the body size. The adjustable backrests are upholstered with high-quality special artificial leather and padded. The soft hygienic material adds to the seating comfort during infrared application.

COLOURED LIGHT*

Light affects our mood and supports the general well-being. Colours can have a brightening effect on our mind and can even strengthen the immune system. The elegant light bar is placed directly on the cabin ceiling and spreads the chosen coloured light. What colour do you feel like?

MUSIC*

Most of us can't imagine a life without music. Some relax with classical music, others enjoy listening to podcasts or audiobooks. Two speakers are embedded in the cabin surface and support ideal sound, whether you start music from the SD card or from your USB stick, use Bluetooth or another function of your choice.

AROMA APPLICATION*

A pleasant fragrance completes your b-intense® infrared treatment, creating an even more relaxing atmosphere. Sprinkling a few drops of pure essential oils in the special stainless-steel aroma bowls, filled with water, is all it takes. Thanks to the warmth from the from heater, the fragrances quickly unfold and waft throughout the entire cabin.

FOOT WARMTH

To prevent cold feet, the cabin floor is equipped with a heating foil. Handy for those who want their feet to stay warm.

* not applicable for open AIR models

„I want to offer a haptic experience of the optic impression. Using real wood and a specific variety of colours results in a „velvety“ feeling. Warm grey tones are on the pulse of time and everlasting at once. All points of user contact are thought through and designed accordingly. The handles are ergo-nomical and tested for different body sizes.“

Peter Groiss
Productdesigner for b-intense®

The placement of the b-intense® full spectrum heater opens new possibilities for private users as well as hoteliers or developers when it comes to hygiene and effect.

The heater is placed on the back wall without screws or sliding rails and exposes an elegant black surface, which lights up red when starting the b-intense® infrared cabin and offers the special health-promoting effect.

STYLISH DESIGN

THIS SUITS ME

Our clients not only appreciate the extraordinary effect of the b-intense® infrared cabins, but also the design, which conforms to contemporary needs. A generous construction, space for smartphone and tablet, high quality of material – our product designer Peter Groiss promotes functionality to be the core of the design.

Due to constant improvement of our products we always stay at the forefront of advancement. That is how b-intense® upholds its position as Austria's leading infrared expert through effect, design and hygiene. Architects and designers utilise the modern infrared cabins to offer their clients a simple, relaxing and soothing daily wellness treatment in their own home.

B-INTENSE® PRODUCTION

INVENTORS AND QUALITY

An infrared cabin is a once-in-a-lifetime investment which can support your health daily. But a high-quality product doesn't just come into existence. Years of know-how, knowledge about material and machines, experience with heat applications, physical knowledge and a lot of attention to detail. Our daily life offers many challenges, but our product also needs to be upgraded regularly. Tastes change, legal regulations are imposed, and new ideas want to be integrated. This is only achievable in a team. Ideally, that team consists of experts, who are passionate about the product. This is how we offer infrared cabins made in Austria, which we can back 100%.

AUSTRIAN PRODUCT

b-intense® models are produced by hand in an Upper-Austrian production facility. In-house research and development teams as well as our quality management keep our products on the cutting edge and the quality on the highest level. Production in Upper Austria creates jobs in the region and flexibility for our clients. We can easily enable adjustments or add leather colours for the interior. Many details are explained easier on the phone, simply call us: +43 2246 27 3 27.

Infrared technology in b-intense® Infrared cabins is a b-intense® development and manufactured in Austria. Its special implementation, user-friendliness and high hygienical standard form a result that fits the high esteem of the b-intense® models.

FROM AUSTRIA TO THE
WHOLE WIDE WORLD
We proudly announce that
every b-intense® cabin is
carefully produced by hand.
Our international clients
appreciate this.
The popular b-intense®
infrared cabins are safely
packed and shipped to Euro-
pe, Russia and via container
transportation to Asia.

INFRARED CABINS, THAT PERFORM AS WELL AS THEY LOOK

MAXIMIZE YOUR WORKOUT

The positive effect of heat application before or after sports is proven. Passively warm up your muscle tissue before actively exercising. This promotes elasticity and minimizes the risk of injury. Infrared applications after sport aid your muscles in relaxing and stimulate your tissue supply. Infrared heat also prepares your body for treatments like a massage.

IDEAL PREVENTION FOR COLDS

Especially in the transition period, your body needs optimal supply to hold off flu and other sicknesses. Infrared warmth promotes blood circulation and therefore strengthens the immune system. An ideal possibility to keep your body healthy and heat up in the cold season. Try the b-intense® infrared programs REGENERATION and REVITALISING.

For more information about the effect visit www.b-intense.at/eu > My Advantages

COUNTER TENSIONS

Many costumers report a decrease in neck pain, backache and headache by using a b-intense® infrared cabin. The infrared program BACK especially deals with this issue. A higher amount of emitted infrared heat enters the back musculature and offers relief and relaxation. As you see, infrared is more than just heat.

POSITIVE EFFECT ON THE SKIN

By regular use of the infrared cabin we can achieve better blood circulation in the skin and improve the skin appearance. Warming up from inside keeps the volume strain on the skin vessels low, therefore the user can enjoy positive effects and an improved skin structure.

I'M ESPECIALLY IMPRESSED BY THE FAST READINESS OF THE CABIN. SINCE THE RADIATORS ARE WARM IMMEDIATELY, I CAN USE THE CABIN ANYTIME.

LONG-TIME B-INTENSE® USERS REPORT

THIS IS WHAT A TYPICAL APPLICATION LOOKS LIKE

One session in a b-intense® infrared cabin usually lasts between 15 and 50 minutes. The beneficial heat can be felt after a short time. To achieve the best results, several sessions a week are recommended, but a daily cleansing session is also an option. Music and colour applications offer additional pleasure. The gentle effect enables reading or using an e-book reader during the session.

B-INTENSE® USERS USE THEIR CABINS:

- > For back and joint pain
- > To tackle stress effectively
- > To sweat and detoxify
- > In the morning, for a healthy start of the day
- > In the evening, to relax before sleeping
- > To warm up before sports
- > After exercising, to prevent sore muscles
- > Before a massage to relax the muscles

ZEN

FIND YOURSELF

DEEP RELAXATION, PERSONAL HARMONY

ZEN derives from Sanskrit and stands for meditation or immersion. ZEN implies living in the moment, appreciating the moment, experiencing unison of all beings and as a result gaining vitality and self-restraint. Take time for yourself, let go and relax. Our ZEN models make this possible.

ZEN LOUNGE

LEAN BACK AND RELAX

Take the time-out you need. Let yourself be embraced by the upholstered high-quality lounge of the ZEN Lounge infrared cabin and recline. The reclined position enables meditation or dozing off – or you can read that book you have wanted to read for a long time.

App-compatible control: „b-control deluxe“ incl. individual radiator control, intensity regulation and Bluetooth function, no preheat time

5 b-intense® user programs: set up own programs via the **b-intense® moments app**

Coloured light: for every mood, subtle background light in the cabin

B-INTENSE 1

MORE ME-TIME

The development of the b-intense® range was significantly influenced by the trend towards an urban wellness lifestyle within one's own four walls. The elegant b-intense 1 model is the fulfilment of this wish. The cabin is easily integrated into bedrooms and living rooms. The beneficial wellness application can be integrated in everyday life. Our clients have pointed out that cabins, that are positioned in regularly used places, are used far more often.

Pine wood not only smells good, it also holds a soothing and vitalizing effect. The essential oils in the pine have been proven to slow down the heartbeat. Manufacturing pine wood is sustainable, since more of it is growing than is processed. With the b-intense® cabin you can integrate a part of nature into your home, which enriches your life.

B-NATURAL

PINE WOOD FOR A HEALTHIER LIFE

The infrared cabin with beautiful native pine wood is not only a trend in country-style ambience, but also fits a contemporary home with natural materials. Based on the b-intense 1 model for one person and b-intense 2 for two people, this model series is manufactured from solid swiss pine.

App-compatible control: „b-control deluxe“ incl. individual radiator control, intensity regulation and Bluetooth function, no preheat time

AIR SOLO

THE SMALL ONE FOR THE BATHROOM

Far off from bulky wooden chambers, the AIR solo is open and innovative. In an elegant design it conveys a new feeling of freedom for an intensive infrared experience in your own bathroom. Through a newly developed b-intense® infrared technology, it is possible to recline in the first „open air“ infrared cabin. Due to the confined space requirements, the cabin is perfectly suited for small bathrooms or wellness rooms.

App-compatible control: „b-control basic“ incl. individual radiator control, intensity regulation and Bluetooth function, no preheat time

5 b-intense® user programs: set up own programs via the **b-intense® moments app**

Seating Deluxe: adjustable backrests with integrated headrest and seat made of white synthetic leather – hygienic and comfortable

Graphite Black Matte/Glossy

The AIR seat can easily be put away.
Therefore, the smallest b-intense®
infrared solution barely needs any
space.

AIR DUO & AIR EASY

INTELLIGENT SPACE-SAVERS

The AIR series models are especially popular for small rooms, bathrooms or in spaces with sloping roofs. Just like the bestselling model AIR solo, the 2-people-version fits perfectly into small, confined spaces. These infrared solutions are possible through the b-intense® full spectrum technology.

App-compatible control: „b-control basic“ for AIR duo incl. individual radiator control, intensity regulation and Bluetooth function, „b-control single“ for AIR easy (not app-compatible, 3 infrared programs), no preheat time

5 b-intense® user programs: set up own programs via the **b-intense® moments app**

Seating Deluxe: adjustable backrests with integrated headrest and seat made of white synthetic leather – hygienic and comfortable

Warm feet: integrated heating foil in the cabin floor

In addition: Surcharge for
change of leather colour,

AUTHENTICITY

EXPRESS YOUR INDIVIDUALITY.

A b-intense® infrared cabin is a luxury item for those who appreciate the beneficial effect of heat and won't do without contemporary designs. This unique combination reveals an exceptional piece of furniture with a noticeable positive effect on your health.

b-intense® infrared cabins are produced with great care and by a master hand. This opens new paths to customize your desired infrared cabin. We can offer a selection of elegant and casual colours. Which leather colour harmonizes with your living room?

Edelweiss White

Night Black

Greybeige

Burgundy Red

For big and small users: Adjust the backrest to your body size.

A ONE-TO-ONE TALK ...

... CAN NOT BE REPLACED. You value reliable consultation? We gladly take our time for you. You can reach us via +43 2246 27 3 27. Just call us and we will inform you about exhibitions in your area. As soon as you feel the beneficial warmth, usually no more words are needed. We are looking forward to your visit!
